UVTAC PMMA Film

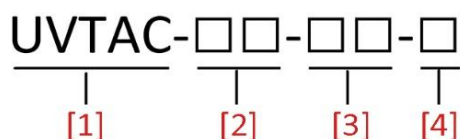

UVTAC Acrylic Film offers outstanding transparency, great toughness, incomparable UV resistance & weather ability. Some people call it “PMMA Film” and “plexiglass film”.

PMMA Film is suitable for Lamination, Adhesion, and Heat-molding Processing. Normally, it is laminated on other materials by hot-pressing or adhesion, such as PVC, ASA, ABS, PET, Wood, Metal, etc. PMMA film is used frequently in Reflective Traffic Signs, Reflective Tape, and Protective film of furniture, doors & windows and automobile interiors, etc.

UVTAC is the family code of UVACRYLIC Acrylic Film products, which is extruded by the modified thermoplastic acrylic resin. It offers excellent physical properties and excellent UV-blocking capability. The standard thicknesses are 45 μm (micron), 50 μm (micron), and 75 μm (micron), the Max. width is up to 1360mm, and it is packaged as rolls with 1000 meters for easy delivery.

UVACRYLIC company is a leading manufacturer of acrylic film in China. We provide standard PMMA Films, meantime, we can develop PMMA films with special functions according to the client’s requirements. Today, UVACRYLICTM PMMA Film has sold to more than 600 clients from more than 40 countries.
